

New Metrotile Roof Protects Immanuel Church In Cardiff From Vandals.

Immanuel Church in Cardiff faced a critical challenge: its aging concrete roof was deteriorating, with cracks and leaks compromising the building's integrity. To make matters worse, the church was a target for vandalism during periods of inactivity. Seeking a robust and secure solution, the church turned to roofing contractors RV Elliot, who selected Metrotile's anti-vandal .9 Bond tile in the Red colourway for the project.

The Bond tile was the perfect fit for this renovation, and the specification opted for the double-thickness, .9 steel as it's added durability and security offered superior protection against vandalism while providing a lightweight yet highly effective replacement for the failing concrete roof. In addition to its resilience, the tile's sleek design maintained the church's aesthetic, ensuring the building remained a community centrepiece.

The result was a roof that not only safeguarded the church from damage and leaks but also deterred future vandalism, offering peace of mind and long-term reliability. The partnership between Immanuel Church, RV Elliot, and Metrotile highlighted the power of combining expertise with innovative roofing solutions.
